RE: Jamie Tomes
Branch Manager
C&H FIRE SUPPRESSION SYSTEMS INC.
London

To whom it may concern,

The retro-fit project for C&H Fire Suppression Systems Inc. at City Centre included the installation of over six thousand fire sprinklers with branch line and main piping throughout our occupied building. The project also included the installation of two new fire pumps and six new pre-action systems. The retro-fit was completed professionally and the quality of work was unparalleled. The field personnel with C&H should be commended for their dedication to this project, the quality of the installation, and the respect they had for our property and our people during this challenging project. Also, their personnel at the supervisory level was involved and communicated regularly with myself allowing me to better manage the day to day business operations at the building.

Overall, I would highly recommend C&H Fire Suppression Systems Inc. for any project. Our project came in on time and under budget and once the professionalism of their service oriented team is exceptional. Redbourne and the tenants of our building are completely satisfied.

Yours truly
(Redbourne Realty Advisors Inc. as managers for RRF London Realities Co-ownership)

Cynthia Burk
General Manager
